Process Operators – Sign On Bonus

Big River Resources Boyceville, LLC (BRRB) has openings for Process Operators. BRRB is located in Boyceville, Wisconsin and specializes in the processing of corn into fuel grade ethanol, dried distillers grains and corn oil. As a part of the operations team, this position is responsible for monitoring process equipment, making sure quality parameters are being met throughout the process, sampling and analyzing process streams, tracking fermentation progress, properly documenting lab and process data, receiving raw materials, loading out final product and following plant safety and hygiene policies. The successful candidate will have the following qualifications: basic mechanical and computer capabilities, able to work well as a team and independently, able to work on elevated surfaces, ability to lift 50 lbs, high school diploma or GED, ability to work a 12 hour rotating shift.

BRRB, LLC offers a competitive salary and benefits package including health and dental, 401k retirement plan, and annual incentive program.
