Hunting with Poppy - Continued from Page 10

Bayleigh with one the fine Mills County whitetail bucks she bagged while hunting with Poppy.

It was such a sweet moment because what followed finding the deer consisted of him taking lots of pictures and telling me how good my first kill was. I was over the moon. We went and pulled the truck over to the tree under which my deer resided, and then proceeded to get the monster into the bed of the pickup. 1 ... 2 ... and before I could say 3, Poppy swung the deer up and I had no choice but to follow. I think he was secretly trying to make sure I didn't chicken out on helping him load this thing.

After that we took it up to the house and skinned it and had a

"brainology" experiment.

Now that I'm older, I get to enjoy going and talking to my grandfather about what's going on in my life. Deep conversation followed by both me and him falling asleep while waiting for the deer to make their appearance. Life is fun with my bestie and going hunting with him is especially fun. If I were to leave you with one thing, it would be this: We are not promised anything but that we will die. We don't know our number of days and it's up to us to make the most memories while we're still here to make them.
