

ANTHRAX SCARE - In this photo from November 2001, shortly after 9-11, Assistant Chief Randy Smith (in foreground) and Lt. Robert Carruthers of the Humboldt Fire Department wear protective biohazard suits with breathing apparatus while handling an envelope suspected of containing anthrax. A magazine was mailed in an envelope from Michigan to Nellie Weddle of Atwood, Tenn. When she opened the magazine, a white powder substance came out. Luckily the substance tested negative for anthrax. But the Humboldt Fire Department was prepared to contain the envelope, magazine and powder in case it was anthrax.
