County Auditor Gleason filled in several busy hours between trains here today issuing hunters' licenses preparatory to the coming deer and moose season, about 35 securing the legal permit, one of the first to apply—Tom Movold said that since he came west thirty years ago he has shot over 600 deer and is was the first license that he had ever required for the purpose. Many who took out license may not take a shot at a deer or moose, but others of them are good hunters. Anyone who did not come in today will now require go to Crookston in order to obtain a license.

F. E. Morrissey, of Crookston, together with a number of his men, has been busy engaged with the installation of the steam heating plant at the public school building. This work, although interesting somewhat with the classes for a few days, will be a vast improvement over the old order of things for the furnace hot air system of heating has never proved satisfactory. It is also a most economical arrangement, for the exhaust steam from the municipal power plant will be used. The elimination of any danger from fire at the school is alone worth considerable. Another week will see the plant in full working order, where a board of education will be able to judge of its efficiency.

**SCOTT'S EMULSION**

is a food medicine for the baby that is thin and not well nourished and for the mother whose milk does not nourish the baby.

It is equally good for the boy or girl who is thin and pale and not well nourished by their food; also for the anæmic or consumptive adult that is losing flesh and strength.

In fact, for all conditions of wasting, it is the food medicine that will nourish and build up the body and give new life and energy when all other means fail.

Should be taken in summer as well as winter.

See and try it, all druggists.
