

ORTHOPEDICS & SPORTS MEDICINE

Dr. Aaron Humphreys is an Orthopedic Surgeon, and he joined Coryell Memorial Hospital System in August of 2014. He specializes in the care of issues of the musculoskeletal system including arthritis, tendonitis, bursitis, sports injuries, work related injuries, knee pain, hip pain, shoulder pain, fractures, and some nerve related pain.

Dr. Humphreys' approach is conservative in treating these issues using injections, Physical Therapy, and other non-operative techniques whenever possible.

Surgeries he often performs are hip and knee replacement, fracture care, tendon and ligament repair/reconstruction, wound care and nerve releases.

He uses arthroscopy and other minimally invasive techniques, including arthroscopic rotator cuff repair. He also supervises the therapy and rehab of his patients to get them back to work, school, sports and life.

Dr. Humphreys is Board Certified by the American Board of Orthopedic Surgery and is a Fellow of the American Academy of Orthopedic Surgery.

Excited to be a part of the Coryell Memorial Team, Dr. Humphreys said, "My family and I wanted to become part of a small, but growing community where I can spend focused quality time with my patients and my free time enjoying the outdoors."

Dr. Humphreys and his wife, Jen, have 4 sons.
