

PROTOCOL ESKETINTRD3001

Have you been diagnosed with depression?

Do you continue to have depression symptoms despite taking at least two different antidepressant medications? **Red River Medical Research Center** is currently enrolling participants for a clinical research study to look at the effectiveness and safety of an investigational medication (given as a nasal spray) in patients with depression who have not responded to prior treatment with at least two antidepressants.

To be considered for the study, you must be:

- 18 to 64 years old
- Diagnosed with depression
- Still be experiencing depression symptoms despite having taken two antidepressant medications in the past
- Comfortable with using a nasal spray
- Able to provide written informed consent

The study doctor will discuss additional requirements for being in the study.

If you are eligible for this study and choose to participate, you will receive all study visits and study-related medical care at no cost to you. Compensation for your time and travel expenses may also be provided.

For more information, please call the study research staff at: **405-759-4121**
