

# Shining more light on solar.

Entergy Mississippi is committed to providing affordable, reliable and clean power to Mississippians for generations to come. So we're making it easier for our customers to self-generate solar electricity and incorporate solar power into our power grid. Thanks to net metering, registered solar users earn credit for excess solar energy sent back to the grid.

The Mississippi Public Service Commission is making it easier to understand how solar can work for you. "A Consumer's Guide to Solar Power in Mississippi" provides information on how solar and net metering work, and the details you need to consider before purchasing or leasing hardware.
