

Lyons Foodliner has been serving Rice County since 1976. It is open Monday through Saturday from 7 a.m. to 9 p.m. and Sundays from 10 a.m. to 6 p.m. It is locally owned by the Geier family. Last fall Lyons Foodliner bought the Gene's Heartland Foods store on West Main in Lyons. Soon after they move from their former location. Foodliner is now located at 1105 W. Main, phone 620-257-2337. They have 35 employees.

# MTC provides state-of-the-art communication

MTC came to Lyons in 2007, and are now located at 125 W. Main. Call them at 620-509-2081.

MTC, also known as Mutual Telephone Company or Mutual TeleCommunications is proud to call ourselves the local Rice County communications provider. From starting out as a simple telephone company, MTC has evolved into a state-of-the-art telecommunications provider. MTC serves many towns in several different counties throughout central Kansas. In fact, MTC has a total of five stores three of which are in Rice County located in Little River, Lyons and Sterling.

MTC can offer a wide variety of services depending on the area you live. Some of the MTC services available include high speed internet, digital TV service, local phone service, a wide variety of calling features, long distance, Next-Tech Wireless cellular service, computer repair, PBX systems, and security & automation systems for your home or business.

One of the main focuses for MTC is continuing to grow our fiber footprint. Fiber Optics, best known as the next generation of broadband, is the only technology that offers virtually unlimited bandwidth. This is becoming vital as more things such as video and gaming move more towards internet based applications. Producing up to 100 times faster Internet speeds, this allows MTC to provide you with the most advanced services today. MTC is even offering speeds as fast as 1 GIG in some areas! As technology advances, your current equipment may become inadequate or obsolete. That's why the "Future Proof" aspect of the fiber network is so incredible. The system is built to grow

and accommodate different applications and programs. As a matter of fact, it can adapt to applications and programs that haven't even been created yet. Fiber Optics can do it all!

Currently 100% of Little River residents and business have access to fiber. After

finishing that project, MTC began placing fiber in both the Lyons and Sterling communities. Although neither community is 100% converted, we do have several different fiber routes in both Lyons and Sterling that would allow many residents and most businesses to take advantage of these top notch services!

All of us at MTC are consistently and diligently researching the latest products and services so we can provide you with all of the same technologies and services you can get in the "big city", but at small town prices. Whether you need reliable Internet service WAY out in the country, or you're looking for the latest and greatest phones and wireless

plans, MTC has got a solution for you!

With MTC being a local company, the staff and board are truly invested and committed to the communities we serve. A big part of this is because your community is our community since most of the staff at MTC lives in Rice County. This means our children go to the same local schools, we shop at the same local stores, and we see each other at the same local events. From sponsoring local teams, serving on local boards and chambers, supporting local events and causes, MTC strives to stay active

in these communities. You can always be sure when you call or stop by one of our offices; you'll talk to a local person who can help you right away.

At MTC, our mission is to provide local,

reliable service to our customers. Offering the latest communication technologies to grow with the communities we service. It is our genuine pleasure to serve you!

MTC began in Little River in 1905. The office is located at 365 Main St. They can be reached at 620-897-6200.

MTC, in Sterling since 2008, can be reached at 620-897-7730 and is located at 107 South Broadway.
