services at no cost to their families. It is important to know that ANYONE CAN MAKE A REFERRAL TO SUNFLOWER EEC, including you! Making a referral does not mean the child will automatically receive services. However, we will contact the parents or primary caregivers to discuss our services, and let them decide if they would like to proceed with an evaluation. All of our services are voluntary (and free!).

Our free developmental screenings and evaluations address the child as a whole and how the child interacts in his or her natural environment (home,

daycare, park, etc). This includes looking at how the child moves and explores; thinks and problem solves; communicates and talks; plays and interacts with others; and takes care of self (eating; dressing). We also complete hearing, vision and nutrition screenings.

Research indicates that early intervention can help children overcome delays and deficits in these areas, so addressing them as early as possible can be extremely beneficial! As our mission statement describes, it is our desire to enhance children's learning and devel-

opment through everyday opportunities in their natural environment to minimize their potential for developmental delays. We also strive to build the capacity of families and caregivers to support their child's development.

Please take some time to check out this quick list of developmental milestones for young children. You can find more detailed information at (<https://www.cdc.gov/actearly>). Please don't hesitate to call us Sunflower EEC at (620)792-4087 to discuss any concerns you have and/or to schedule a screening or evaluation for those you care about!
