

# Farming in Minecraft, Sept. 2

The Soybean Festival will host the second annual Minecraft event at UTM's Gooch Hall Room 325 on Sept. 2. Children ages 10 to 17 are invited to play. The children will not be free-roaming but will be playing with a mission.

The world that the children will play in has been specifically designed for the Soybean Festival and features many of its sponsors. At the beginning of the game, kids will be given in-game currency and will be given the choice of starting to farm right away or of going to college and learning how to farm. During the game, the children will need to buy land from a realtor, start a farm and build a house. They must sell their harvests and either reinvest the money or save it. At the end of the game, the child with the highest net worth

wins.

This awesome Minecraft World was created by Twin Oaks Technology in Martin. There will be two game sessions on Sept. 2, one from 8

a.m. to noon and one from 1 to 5 p.m. The event is co-sponsored by Northwest TN Entrepreneur Center, Launch TN and The University of Tennessee at Martin College of Agri-

culture & Applied Sciences.

This activity is for ages 10 to 17 and costs \$10 to register. You can register online at [www.tnsoybeanfestival.org/Minecraft](http://www.tnsoybeanfestival.org/Minecraft).
