## Did you know?

Over the last decade, seniors have become increasingly more savvy in regard to social media usage. The Pew Research Center found that, in 2015, around 35 percent of people age 65 and older reported using social media. That's a large jump from just 2 percent in 2005. As of 2016, 65 percent of people between the ages 50 and 64 reported using social media, according to Pew. Social media usage among seniors continues to climb, although young adults still comprise the demographic most likely to use it. Among seniors ages 50 and older, Facebook is by far the most popular social media platform used, followed by Pinterest and LinkedIn.
