

Take Action

PROTECT YOUR PROPERTY

Planning and preparing before a hurricane strikes can help you manage the impact of high winds and floodwaters. Take the steps outlined below to keep you and your family safe while protecting your home and property. If you are a renter, talk with your landlord or property manager about the steps you can take together to protect yourself, your family, your home, and your property.

WIND

High winds:

The best way to reduce the risk of damage to a

structure from hurricane winds is to reinforce or strengthen the building including doors, windows, walls, and roofs. The best way to protect yourself is to consider either constructing a safe room that meets FEMA criteria or a storm shelter that meets ICC 500 criteria.

Wind-borne debris:

Bring loose, lightweight objects (e.g., patio furniture, garbage cans, and bicycles) inside; anchor objects that would be unsafe to bring inside (e.g., gas grills and propane tanks); and trim or remove trees

close enough to fall on buildings.

FLOOD

There are steps that you or your property owner can take now to make your home or business more flood resistant. Some improvements are simple and inexpensive; others require more of an investment. As your budget allows, take these steps to protect your property from flood damage and manage your risks.

- Keep gutters and drains free of debris.
