afraid of contact. He will help us especially on special teams.”

**“WYATT PEMBERTON** (So., 6’1”, 150 lb., WR/DB) plays wide receiver and defensive back. Wyatt is a very coachable kid which is a very important quality for a football player. He will do what you ask him to do to the best of his ability. He is a smart football player — he understands things. He understands coverages, routes and the concepts of routes. I am looking forward to seeing Wyatt perform out there on the field. I think he is going to have a good year for us. He is battling for one of those positions in the secondary right now.”

“It is a good group,” said Clemons about the sophomore class. “We are looking forward to getting them out there.”

The freshman class includes nine players. Among them is a player (Zyshawn Andrews) who was a nationally ranked prospect in junior high and a quarterback who was a duel threat at the junior high level (Treyson Davis). The class also provides five Tigers who could play major factors in the trenches within a year or two.

**“TREYSON DAVIS** (Fr., 5’9”, 138 lb., QB/WR/DB) is a wide receiver and a defensive back. He has great ball skills, plays the game fast and understands the game. He is working a little bit at quarterback right now. He is just a good overall athlete — he plays basketball and baseball. Those are the kind of kids you gotta have out there in the skill

positions to make you better. Treyson is pretty gritty to be 140 pounds. He could see some time in our secondary this year or as a receiver as well.”

**“ROMEO ROJAS** (Fr., 5’11”, 153 lb., WR/LB) is going to work as a kicker for us some. He also plays wide receiver, a little outside linebacker and inside linebacker too. Romeo is a kid who just needs to add some strength and some size — we expect great things from him down the road.”

**“ZYSHAWN ANDREWS** (Fr., 6’0”, 205 lb., TE/DL) is one of those kids who is blessed with some size. Early on, he is already six-foot and over 200 pounds. Zyshawn is starting to learn that in junior high football he was able to get by with some things, some techniques that have to be taught here and played with at the high school level — it is a little different ball game. So, if we can get that figured out, Zyshawn could help us out at the defensive end position and he is also working at tight end for us too.”

**“JOSH HAIRE** (Fr., 5’9”, 140 lb., WR/DB) is a kid who is blessed with some tremendous speed. He runs well. He is getting better at catching the football so he is not completely out of the mix at wide receiver. He has got to understand a little more about route concepts and how to run good routes in order to be more consistent.”

**“JAMES PITMAN** (Fr., 5’10”, 170 lb., OL/DL) has got good size. So far in practice, we have seen some good things out of him. He is just a kid who needs to get some size, strength on him and teach him some technique. He will be ready

to have a good career here at Gordonsville also.”

**“LEVI CROSLIN** (Fr., 5’6”, 180 lb., OL/LB) is a kid who is an offensive lineman and a linebacker for us. He plays some guard and center. He does some different things. Levi is a hard nosed kid. He is gritty. He has played a lot football in his time and understands the game — he is pretty smart. He is a guy who is pretty versatile. He plays a lot of different spots. He also is a kid on scout team who makes a lot of tackles — we do not get him blocked very much. He understands the game and that is a big part of this too.”

**“DYLAN SINGER** (Fr., 5’10”, 180 lb., OL/DL) is a kid that has some size. He is offensive and defensive line type of kid. He just needs some strength and some time. I think he will be a good football player for us down the road.”

**“JASPER TUBBS** (Fr., 5’9”, 180 lb., OL/DL) is another one of those freshmen who needs to add strength and technique. Jasper is going to turn out to be a good football player here but those things are going to have to be worked on. If he continues to do that, he will be okay.”

**“JORDAN GENTRY** (Fr., 5’9”, 180 lb., OL/DL) is an offensive and defensive lineman. He plays some guard and works in the defensive line. He could also get to play at defensive end some. Again, a kid that if you put some size and strength on him — he is going to be a good football player down the road for us”

“This group had a great year last year in junior high,” said Clemons on the Big Blue’s freshman players. “We expect great things from them in the

future. They realize now, age wise, they are a little behind the eight ball, but this group has the opportunity to see some playing time for us this season. We expect them

to add some depth for us at different positions and for some of them to compete for playing time with some of our guys. We are looking forward to coaching that group and

maybe we can find somewhere for them to help us. When you start looking at special teams, the opportunity is there for a lot of people to play and help our football team get better.”

## We are Riverview

### Best Wishes Owls and Tigers for the 2018 Season

When it comes to sports medicine care, Riverview Regional Medical Center provides comprehensive diagnostic services, physical therapy, and orthopedic surgery. At RRMC, we’re ready to meet the needs of both the student athletes and the “weekend warriors” in the community we serve.
