

Safety renovations for seniors' homes

Feeling safe and secure at home is a priority for any homeowner. But safety is of particular concern for aging men and women who are at greater risk of being involved in accidents at home than younger men and women.

Harvard Health Publishing says that accidents at home are among the leading causes of injury and death in the United States. The chances for fatalities increases as one ages, and by age 75 and older, men and women are almost four times as likely to die in a home accident as people a decade younger.

As people age, their balance, eyesight and general physical abilities can begin to diminish. Furthermore, a fall or incident that may only bruise a younger individual can cause more serious breaks or damage for seniors, resulting in potentially lengthy recovery times.
