

# Wedding weather?

(Continued from page 8)

bring in a portable generator to keep the reception room cooled by fans.

• **Plan for wind.** Coastal outdoor weddings present beautiful backdrops. But being near the shore may mean accepting windy conditions. Tie down tents and use weights to keep wedding programs or other papers from catching a current. The bride

and her wedding party should opt for free-flowing tresses so they needn't worry about intricate updos coming undone.

• **Maintain a sense of humor.** It's impossible to predict wedding day weather, but staying calm, going with the flow and laughing at things they can't control can help couples make memories that last a lifetime.

## RECEPTION PERFECTION

### St. Henry Financial Life Hall

(formerly CK of A)

Hall rental available • Comfortably accommodates 225

**Call 812-367-2046**
