Forest County Public Health Nurse Jacee Anderson reminds everyone to be safe while using area lakes and to be sure to always wear a life jacket when out on the lake. Anderson stands beside one of two separate "life jacket loaner stations" located on Lake Metonga, where free loaner jackets are available. Anderson commented, "We are encouraging community members and visitors to utilize the life jacket loaner stations located on Lake Metonga and Silver Lake in Laona. This is our second year offering this important safety program and have received lots of positive feedback as a result and are very happy to continue to offer this and to thank our local partners who help us to fund this very important opportunity in keeping everyone safe on our lakes again this summer!"
