# We Are Your Custom Wheel & Tire HEADQUARTERS! ALL BRANDS OF WHEELS & TIRES! PLUS ALL YOUR TRUCKING ACCESSORIES CUSTOMS Located at Midtown Motors THE BEST PRICES AROUND!

# Useful tech gadgets for a successful road trip

Are you going on a road trip this summer? There are lots of great tools out there to help you organize your vacation and make it as enjoyable as possible.

### A GPS IS A MUST

The GPS has become a must for drivers who are going into unfamiliar territory. However, before you set off, update your device. You won't be very happy if it directs you to a turnoff that no longer exists. Program the different stages of your journey in advance to ensure that the GPS recognizes the addresses. If it doesn't, which sometimes happens in remote areas, you can then print a map or the directions provided by the establishment you want to visit.

### **PRACTICAL APPS**

Many practical apps are now available on the market. Use them to find the cheapest gas station, the best hotel with available rooms, your car in a crowded parking lot or nearby restaurants. Apps can also help you avoid traffic jams or discover points of interest along your route. Download them before you leave home.

## **FUN FOR THE RIDE**

Are your passengers lucky enough to have a DVD player at their disposal? Take along a selection of movies that will keep everyone happy. Electronic games can also help pass the time and keep kids from bickering when the road seems endless. Lastly, what would a road trip be without music? Prepare a few playlists that will set the tone for your vacation.

Have a great road trip!

Make sure your GPS is up to date before leaving home; you don't want to end up in a field somewhere.
