

A large steam thresher is the central focus, positioned in a field at night. A massive, dense spray of bright orange and yellow sparks erupts from the top of the machine, cascading down the left side of the frame. The thresher itself is dark, with large spoked wheels and a complex mechanical structure. A red cylindrical tank with the word 'RICHMOND' is visible on its side. In the background, a white barn and other smaller structures are illuminated by artificial lights under a dark, cloudy sky. The overall scene is dramatic and industrial.
