

WMSTR: the Next Generation

By **JEN MILLER**
Staff Writer

The next generation, or Millennials as they're called, is known for a lot of things; one of them is being tech savvy. Their lifeline is a connection to the internet and they're moving forward at a fast pace. If you think that's impressive, it will blow your mind what else Millennials are capable of.

This generation that was born and raised in the digital era can run both high tech farm equipment with the latest software and fire up steam engines with parts dating back to the 1800s. They know their way around engines like the 1899 Minneapolis
