

SGMC NOW OFFERING MAMMOGRAPHY IN A NEW DIMENSION. 3-D.

SGMC has a powerful new tool- 3-D mammography- to help in the early detection of breast cancer. 3-D mammography is an advanced technology that takes multiple images of breast tissue to recreate a 3-D picture of the breast. It's different than traditional mammography, which obtains just a single image.

BENEFITS INCLUDE:

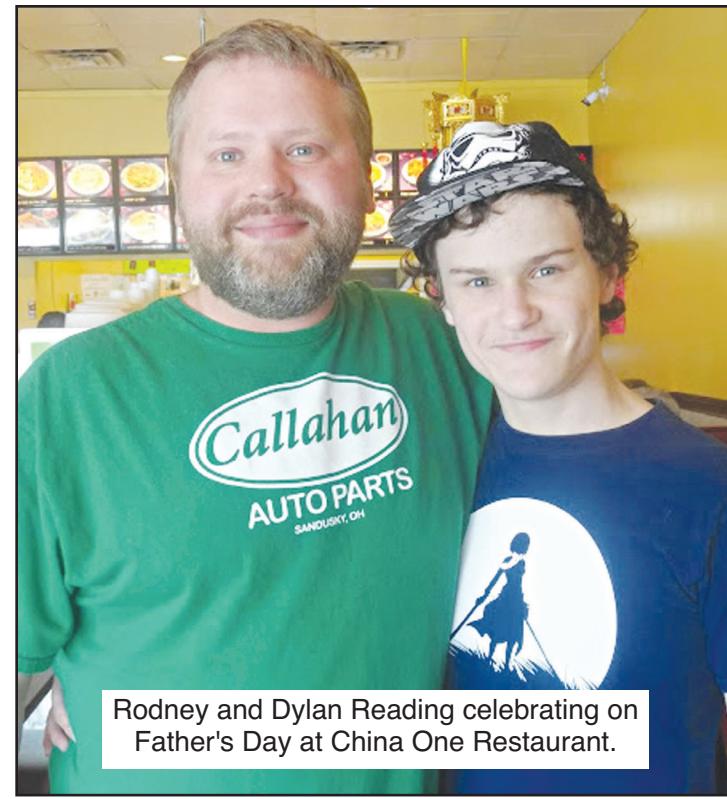

- Better breast cancer detection (detects 35% more cancers)
- Fewer callbacks for false positives (save stress and money) Examines the breast in more detail

AVAILABLE NOW AT SGMC'S IMAGING CENTER & SGMC'S OUTPATIENT PLAZA. AT AGE 40, WOMEN SHOULD BEGIN ANNUAL MAMMOGRAMS. CALL 229-293-3640 FOR MORE INFORMATION!

Mammography accredited by the American College of Radiology

participating in their child's birthing experience were evident.

Dad was a wonderful man and a caring father, who rarely changed a diaper, bathed me nor participated in the sewing of my clothes which characterized much of mother's interactions with me. However, he would play with me and would bring home business associates showing me off

at all hours clearly continuing the pride that began that Milwaukee birth day!

Enjoy the photos of our area celebrants and ponder: What will the world look like when our sons become adults? How will our sons' and daughters' families honor him on Father's Day? What will be his typical role to his children during their lifetime?

Joo Kim receives degree from GA Tech

Joo Kim of Ray City has earned a Bachelor of Science in Civil Engineering from the Georgia Institute of Technology in Atlanta.

Kim was among approximately 3,700 undergraduate and graduate students who received degrees during Georgia Tech's 255th Commencement exercises on May 4-5, 2018, at the McCamish Pavilion.

One of the nation's leading research universities, the

Georgia Institute of Technology is in the business of creating the next - the next idea, the next technology, and the next legion of agile minds well equipped to imagine and engineer our future. More than 25,000 undergraduate and graduate students are enrolled, and Georgia Tech is ranked in the nation's top 10 public universities by U.S. News and World Report. For more information visit www.gatech.edu.

the importance of pursuing those individuals, including licensed medical professionals, who are preying on the addictive nature of opioids and other controlled substances," said United States Attorney Charlie Peeler. "My office and the Department of Justice have made efforts to control what the CDC has declared an Opioid Epidemic in this country that is killing people and fueling the current spike in illegal heroin trade. Doctors are not above the law and our office will continue to hold doctors accountable for illegal practices that put powerful, addictive and dangerous painkillers and other substances into the hands of those who do not medically need them."

Robert J. Murphy, the Special Agent in Charge of the DEA Atlanta Field Division said, "The devastation caused to human lives by prescription opioid abuse cannot be overstated. The prescription opioid epidemic that this country currently faces can be traced directly to unscrupulous medical practices where the practicing doctors and owners prosper and the patients suffer grievously. Patients at 'pill mills' can expect to lose fam-

ily, money, their health, happiness and possibly their lives. Physicians who run these illegal practices can expect to be investigated, prosecuted, and sent to prison in the same way as other drug traffickers who push poison in our communities. DEA, its law enforcement partners and the U.S. Attorney's Office presented a united front which led to the successful prosecution of this case.

"Doctors who illegally dispense prescription narcotics must be held accountable for their actions. This conviction demonstrates the great work of law enforcement at all levels to investigate and prosecute the illegal distribution of prescription drugs negatively impacting Georgia and our surrounding states. The GBI remains committed to working with our federal partners in drug enforcement to address these types of crimes."

The case was investigated by the Drug Enforcement Administration, the Georgia Bureau of Investigation and Internal Revenue Service – Criminal Investigation. Assistant United States Attorneys Robert D. McCullers and K. Alan Dasher prosecuted the case for the United States.

I CHOSE TO BE DIFFERENT IN MY CAREER FIELD!

FREE APPLICATION DAY
JUNE 21
7:30AM - 6:00PM ON ALL CAMPUSES

FALL SEMESTER CLASSES START AUGUST 15

Apply in person and have your application fee waived!

Please plan for the following:

- Provide proof of lawful presence (Government Issued Driver's License or ID, Birth Certificate, etc.)
- Plan to take the college placement test or provide valid ACT/SAT/Compass/ACCUPLACER/GED/ELA scores
- Submit official high school or high school equivalency transcripts (request in advance, if possible)
- Submit official transcripts from all colleges previously attended (can be sent electronic and requested in advance)
