## VPE EXCLUSIVE!! INDUSTRY FIRST TECHNOLOGY!

**\$99**  
per row

Valley Plains Equipment has taken the world's best planting equipment to the next level with UNMATCHED PLANTING ACCURACY AND SINGULATION! Here at Valley Plains Equipment, we constantly strive to bring the best to our customers through the products we sell, unequaled parts and service support. Driven by this common goal, we have found a solution to improve on an already industry leading planting, and seed meter system. By strategically machining critical parts of the John Deere seed meter, we have tightened the tolerances to nearly zero. What does this mean? This means every time our customers remove and install the ProMax 40, beet, sunflower, edible bean seed disks, it will run true EVERY TIME. We invite you to stop in and discuss how we can improve your seed meter planting solutions!
