

Seconds count! Are your 911 signs visible?

During an emergency every second counts and valuable time can be lost finding you if your address number is not posted clearly. Fulton County Farm Bureau, in cooperation with Fulton County ESDA, is offering visible reflective address signs, which we recommend highly.

For \$15, Farm Bureau members can get a predrilled aluminum reflective green sign (6" x 18") with your address numbers listed vertically on both sides. The cost to non-Farm Bureau residents is \$30.

It is recommended the sign be mounted on your mail box, mail box post, or on a

stake at your driveway/lane entrance, and visible from either direction.

If you live in a rural area and already have your address numbers displayed, first responders prefer the green reflective signs over any other type of sign.

They can easily be seen from far distances

both day and night. Precious seconds are wasted every time first responders have to slow down to check for house numbers that are poorly marked, or not marked at all. Help rescue workers find you faster.

Order forms can be found on the Fulton County Farm Bureau website.

Celebrating 32 YEARS!!!
