Weather no obstacle for Freedom Celebration

By Tony Hooker **Staff Writer**

A summer storm, blowing through at exactly the wrong time, was one of few blights on an otherwise promising first time event as the Celebration of Freedom took place

on July 1 at Villa Grove's

Richman Park. A host of volunteers did their best to get the inaugural event off the ground, and indeed, three of the four main events were completed without a hitch. Somewhere around fifty young ball players braved the hot temps to put on a show for their families at the coach pitch tour- wagons and scooters in the sets and solid musicianship, nament. Three Villa Grove teams, along with a team composed of players from several area towns competed, and it's a fair bet to say that all the competitors had a great time extending their season for another few games. From my vantage point, the teams appeared to be well coached, with the proper emphasis being balanced between teaching the fundamentals of the game and winning and fun was had by all.

The love of country shined brightly as 29 brave contestants entered their bikes, Patriotic bicycle parade and decoration contest. By the time the sparkling, shining, red, white and blue festooned vehicles had passed in review and the judges' votes had been tallied, Rylan Lake was voted the winner, with the team of Aim & Addie Wilson finishing second. Jessie Faith's patriotic bike was good for third place, but all the participants had fun and got Colonel Klink's bounce house tickets for their efforts.

Garrett and the Geezers, quickly gaining a strong following based on their eclectic

were just beginning to get rolling when the weather set in, but those in attendance enjoyed their initial offerings.

Finally, the fireworks. Because of the complexity of Melrose Pyrotechnics shows, they have to be set up hours in advance, and according to the technicians at the show, aren't safe to unload after being primed. Ultimately, the rather controversial decision to light them off in the rain was made, but according to those in the know, they would have to have been shot off regardless of the presence of an audience, and for many the experience of watching them during a steady rain was a new one.

The event, dedicated to our men and women in uniform, both past and present, wasn't without its glitches. No event of this size ever is, but it certainly seems worthy of another attempt in 2019. Let's see how big the event's organizers, along with the city of Villa Grove, the Villa Grove Chamber of Commerce and VG Summer Recreation, can grow this event.

Church took a break from selling pies and other goodies to pose for a snapshot at the Villa Grove Freedom Celebration on July 1. Photo By: Tony Hooker

Second Annual Steam Threshing Show set at **Amish Heritage Center**

The second annual Steam Threshing Show will be held on August 3-4 at the new Illinois Amish Heritage Center three miles east of Arthur, Illinois. Times will be 10 a.m. – 6 p.m. on Friday and 9 a.m. to 4 p.m. on Saturday.

The 2018 show will be centered around harvesting and threshing oats rather than wheat. The oats will be cut and bound into sheaves by a horse-drawn mechanical binder two weeks before the event after which the sheaves will be stacked into shocks for drying in the field. On the day of the event, they will be loaded onto horse-drawn wagons and transported to the threshing machine which will separate the grain from the chaff and straw. The grain will be directed to a bin and the straw will form a hay stack that will continually grow with each new round of

The threshing process will be done using antique farming equipment. Other antique and vintage agricultural equipment will also be on display. Farm equipment demonstrations will feature a John Deere stationary hay baler, old engines and steam engines, a grist mill, field demonstrations of plowing and disking, with Belgian horses and the old methods of threshing grain by hand with flails and a fanning mill. Blacksmithing will also be demonstrated, as well as goat milking and butter churning. All demonstra- Cont. pg. 2

September 11, 2018 will be the first day of class for a new group of University of Illinois Extension volunteers in Coles, Cumberland, Douglas, Moultrie and Shelby counties. While the Illinois Master Naturalist program is not new for the University of Illinois Extension, it is new for U of I

Extension Unit 19. In Coles County and the

the Illinois Master Gardener program has trained volunteers to disseminate research based horticultural information to residents in the area for many years. The Illinois Master Naturalist program is very similar, but the focus of outreach by volunteers is environmental stewardship. The program is designed to educate and train a corps of volunteers to provide support in the conservation, manage-

the area's natural resources in collaboration with local partners. The training provides

science-based educational opportunities that connect people with nature and help them become engaged environmental stewards. The initial 40 hours of training will be presented at Douglas-Hart Nature Center through sessions that include lecture, discussion, and hands-on every Tuesday, from 9:00 am until 4:00 pm, beginning September 11, 2018 through October 23, 2018. An additional orientation and introductory meeting is scheduled on August 28, 2018 at 6:00 pm.

With the help of local experts, University of Illinois Extension provides the educational support for the program, while volunteering is typically coordinated through local partners. In our Extencurrently include Douglas-Hart Nature Center, Grand Prairie Friends, and the Coles County Soil and Water Conservation District. Volunteer Master Naturalist service projects may include wetland, forest, and prairie restoration; fish, wildlife, and plant inventories; environmental education programs for youth and adults; and interpretive tours at the visitor center. The list of volunteer Cont. pg. 2
