Hearing aids do not restore natural hearing. Individual experiences vary depending on severity of hearing loss, accuracy of evaluation, proper fit and ability to adapt to amplification. See store for complete warranty details. *Studies conducted at the University of Northern Colorado (2014) and Oldenburg Horzentrums (2013) showed that Speech Reception Thresholds (SRT) in cocktail-party situations improved up to 2.9 dB for wearers with mild to moderate hearing loss using GENIUS™ 2.0 with Directional Focus, compared to people with normal hearing. This corresponds to over 25% improvement in speech understanding. **If you are not completely satisfied, the aids may be returned for a full refund within 30 days of the completion of fitting, in satisfactory condition. Fitting fees may apply. ©2016 Miracle-Ear, Inc.
