

Custom designed Granite and Marble

Helping your kitchen become both functional and beautiful for over a decade.

By Kevin Thomas

Quality materials to last a lifetime

At Unique Granite, quality is our number one concern. We want you to be happy with your purchase for years to come and that is why we only use premium grade stone, machining, and finishes in every job we do. Our stone is handpicked; hand inspected, and brought in from all over the world, to complete your project. Our quality doesn't stop at our stone; but instead also extends to our machining and methods.

We have invested very heavily in precision instruments capable of following even the most contoured wall imaginable, and to leave the highest quality shine possible. We even have the ability to simulate your countertops before we ever make a cut using a program called Slabsmith. Last but not least, our teams use the absolute latest technology available to install your countertops with minimal mess and seam presence and then finish the job with an astounding 15-year sealer so you can live worry free for years to come.

Don't settle for only a few choices

We are committed to doing things a little differently than the industry norm, and part of that is to offer a huge selection of stone that you can see here. We currently have over 1,500 slabs of natural stone in stock so you can see the full slab of what you are getting and not just a small sample. Combine this with over a dozen quartz lines and worldwide network of suppliers and you are sure to find exactly what you need. Not only do we offer full slabs for big jobs but we also have over 4,000 remnants offered at discounted prices to complete any project.

Outdoor Areas

At Unique we are always looking for more ways to serve our customers. We have recently branched out into the outdoor sector in a big way. We have always offered outdoor natural stone countertops, but we now can offer the whole package as well with a new line of poured concrete panel systems. With these systems we can make the entire base for your outdoor kitchen, full fireplace features, seating walls, firepits and much more, all from extremely high strength GFRC concrete that we can color and size to meet your design.

When you want to find extraordinary stone collections come visit Unique Granite at 2601 Old Henderson Rd. Owensboro, KY.
