

# Let us build your backyard dreams!

Husband and Wife partners, Bruce & Rita Flener, who still operate the business today, founded Professional Pool Service, Inc. in 1994. "We have always strived to treat our customers and employees as family", say Bruce Flener. "We install in-ground and above ground pools and spas and provide a full line of service on in-ground, above ground pools and spas.

"Professional Pool Service offers free water testing and a full line of chemicals at the lowest prices around, Bruce said. We sell Doughboy above ground pool, Sun Fiberglass & Imagine Fiberglass in-ground pools and steel wall vinyl lined in-ground pools".

Professional Pool Service also replaces **in-ground** and **above ground liners** using Tara Manufacturing 100% USA vinyl, and Doughboy aboveground liners.

What separates Professional Pool Services from other pool service companies is their unwavering belief in the long-term viability. It is a full-service approach that is required for success. You can rest assure Professional Pool Service, Inc. has the interests of each customer in mind throughout the entire design and construction process. They go to great lengths to make sure they understand exactly what the customer wants, and then they go to work making it a reality. "Our construction crews are highly trained and experienced with many different types of pool equipment and construction techniques" say Bruce. "Our commitment to quality is very evident in the craftsmanship of our work.

We want our customers to feel comfortable with the construction process, so we

welcome any questions or concerns." Bruce said. "Many homeowners worry about how the construction process will affect their homes and their lives. To ease your mind, please visit their website at <http://www.propoolsandspas.net> and click on the

Construction Tab. We've created a step-by-step outline to let you know what to expect", Bruce stated.
