

## New Alternative Wellness Clinic

Dr. Jesica Mills, is passionate about integrative health. "I want to help find what works best for patients' health." We aim to find the "root cause" of your symptoms and address those. She is the owner of Owensboro Family Pharmacy and Wellness, and is a Pharmacist and Naturopath.

Owensboro Family Pharmacy offers new services that have changed how healthcare is delivered. One service is flu/strep/UTI/RSV testing, where you receive treatment at the pharmacy without going to a doctor first. Patients trying to quit smoking come in and receive nicotine replacement, Chantix, or Wellbutrin. Patients needing an Epipen for allergies, and those travelling abroad needing medications or vaccines also can come to the pharmacy for treatment. We also offer all vaccines without having to get a prescription. If you can't come to the pharmacy, call us and we can come to you.

Another service is the medicine tray program. Patients with multiple medications can have a tray of their medicines delivered once a week, pre-filled in the right boxes. Patient's and doctors are seeing the benefit. We have even received prescriptions to be enrolled in our tray program from doctors. The program is easy- bring your medicines to the pharmacy, we ensure you're taking the right medicines at the right time, and we make sure you never run out of refills. We handle any medicine changes for you,

and you don't have to fill your medicines at the pharmacy to use this program. We then deliver your tray weekly or every other week.

Owensboro Family Pharmacy also syncs their patient's medicines to be due at the same time every 30 or 90 days. We call to make sure there are no changes, and then let you know when it will be ready. If you can't get to the pharmacy, we offer free delivery in Owensboro, and mail medications to those living elsewhere.

We are also known for their compounding. From hormones, creams, and low-dose Naltrexone, many patient's use this service. One very popular compound they make is low-dose Naltrexone.

Owensboro Family Pharmacy is opening a new integrative medical practice in November 2019. The new practice is Owensboro Family Wellness, and will be next door to the pharmacy. "We'll have a Nurse Practitioner working on the medical side of the clinic. They'll be able to see patients as a primary care provider, and we will also see clients for Natural and Alternative Health."

Owensboro Family Wellness will accept all insurances and provide alternative remedies, local products, IV hydration, and more. IV Hydration rejuvenates the body, so if you feel like you are about to be sick, it's a fast way to give your body some help fighting off an infection.

*Dr. Jesica Mills*

OWENSBORO FAMILY PHARMACY

Jesica is a Doctor of Naturopathy and a Doctor of Pharmacy, so she is qualified to educate on medical and natural products that can help with any issue. Her goal is to educate and empower her patients to take charge of their health. The medical practice will help to balance hormones, prevent chronic illnesses, and prescribe the medications and treatments needed. We will have a retail space for innovative products, like vitamin patches that can help with sleep, weight loss, energy, and focus. Our family medical practice will be able to pull your labs and see what's deficient and how we can best support the body. We support the gut to help with immunity and balancing mood. We look at labs for food sensitivities, vitamin deficiencies like vitamin b-12, and we genetic test to see the best medications, diet, and exercise for weight loss.
