

# City offering free Larvicide tablets for mosquito control

*Special to The Clinton Courier*

The Clinton Public Works Department has free Larvicide tablets available to Clinton residents. Tablets may be picked up at the Public Works Department at 525 Springridge Road each weekday from 7 a.m. until 4 p.m.

Larvicide tablets treat areas of standing water to kill mosquito larvae before they can mature. Tablets are distributed on the surface of stagnant water locations. Larvicides will last only a few weeks in water and pose no danger to humans, non-targeted animal species or the environment when used according to directions.

The tablets are a service of the Clinton Public Works Department in an effort to control the spread of mosquitos in Clinton by treating the source of mosquito breeding.

In the meantime, individuals can do their part by eliminating mosquito breeding habitats around their homes and preventing bites through the use of long-sleeved clothing and

EPA-registered repellents such as DEET, picaridin, IR3535 and oil of lemon-eucalyptus.

The most effective and economical method of mosquito prevention is dumping out containers around the home that create a habitat for mosquitoes to lay their eggs. These containers should either be dumped out every three days or covered to prevent collecting water.
