

MAXIMIZING YOUR RECOVERY

If you or a loved one no longer requires care in an acute setting but still need medical care that may not be able to be received at home, our facilities are designed to meet these needs. We also provide transitional care, where you will receive the continued medical and therapeutic management you may require to be strong enough to go home or to a lower level of care.

OUR REHABILITATION AND NURSING SERVICES

Our rehabilitation programs help people restore strength, function and independence following surgery or a hospital stay. Individualized plans of care are delivered on a short-term basis. Our vision calls for quality and outcome-focused post-acute care that meets individualized patient needs.

- 24/7 admissions
- Orthopedic, pulmonary, cardiac, wound and stroke recovery care
- Short-term rehabilitation with on-site physical, occupational and speech therapies
- RN coverage
- Respite Care

INFORMATION AND CRITERIA REQUIRED FOR ADMISSION

PROVIDED BY PHYSICIAN'S OFFICE OR
HOSPITAL CASE MANAGEMENT

- Minimum 3 night in-patient hospital admission within the last 30 days required if patient has Traditional Medicare
- If patient has other insurance or a Medicare Replacement Policy, specific guidelines or requirements may vary (Most plans do not require a 3 night in-patient hospital stay)
- Physician order for SNF
- Current history and physical
- Current medication list
- Therapy note(s) or order for therapy
- Discharge orders
