PBC Approves Sterile Needle and Syringe Exchange Program

Palm Beach County is the first county in the State of Florida to authorize the operation of a Syringe Exchange Program following recent state legislation allowing local governments to establish the programs to prevent infectious disease among intravenous drug users. On September 1, the Board of County Commissioners approved an agreement with Rebel Recovery Florida, Inc., a nonprofit recovery support and HIV/AIDS services organization, to operate the Syringe Exchange Program as part of the Palm Beach County Community Services Department Infec-

tious Disease Elimination program.

"Our needle exchange program is long overdue," said Commissioner Melissa McKinlay. "It is the result of lawmakers finally understanding these programs address a public health issue, not a moral failing. Ultimately, our goal is to end addiction. In the meantime, we must react responsibly in our community to reduce the spread of infectious diseases like HIV and hepatitis while offering access to resources in a compassionate environment. I would like to thank Rebel Recovery CEO Justin Kunzelman for seeing

a good program in Miami and working with Hansel Tookes, M.D., M.P.H. to expand it statewide. I am proud to champion the effort that made Palm Beach County the first county in the state of Florida to expand the Infectious Disease Elimination program."

The program will offer free one-to-one exchange of clean, unused hypodermic syringes for used syringes and needles to help prevent the transmission of HIV, viral hepatitis, and other blood-borne diseases. The program will also provide a bridge to substance use disorder treatment, recovery

support, as well as other primary health and social services for intravenous drug users.

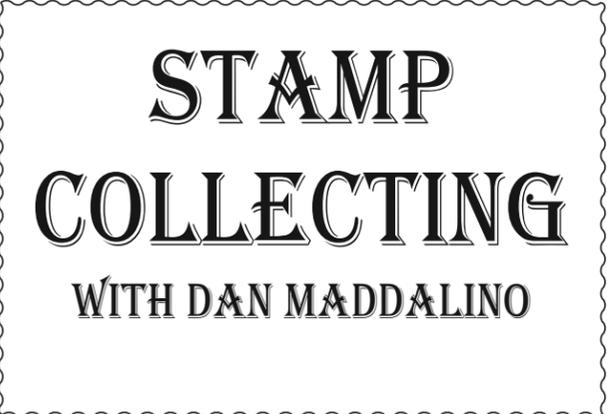

Rebel Recovery Florida, Inc. plans to operate the Syringe Exchange Program from one or more mobile health units to provide services in targeted areas throughout Palm Beach County. The program projects to serve 200 participants and exchange 210,000 needles in support of ending the HIV epidemic in Palm Beach County by 2030.

For more information about the Syringe Exchange Program, please contact Rebel Recovery Florida, Inc. at (561) 508-8388.

AMERICAN LEGION VOGEL-LEE POST 47, 2315 N. Dixie Hwy, Lake Worth. 561-582-4616.

Inviting all women! If you have ever been curious about the hobby of stamp collecting, or you are an experienced stamp collector, Philately needs you!

Queen Elizabeth II of Great Britain has been a life-long stamp collector and enthusiast. She reviews the designs of every British Empire postage stamp prior to its printing and release. Her Royal Collection is one of the finest anywhere.

According to information collected by The American Philatelic Society, women are not only a significant participant in the hobby through influencing the USPS on stamp topics and designs, but also through the American Topical Association with award winning exhibits and research. Also, women and their roles in American society, have been featured on thousands

of USA postage stamps. Women are showcased in roles from nurturing and protecting children to government leadership and space travel.

Most women stamp collectors, however, tend to be silent participants.

Simply focusing on their collecting interests without joining stamp collecting organizations. Organized philately (stamp clubs) need your participation, leadership, and knowledge.

New to the idea? If you have ever considered experiencing the world of stamp collecting, then now is the time to take a step towards fulfillment. A visit to the Palm Beaches oldest and friendliest stamp club: Cresthaven Stamp Club will bring you together with knowledgeable and helpful collectors.

Begin your journey by visiting www.cresthavenstamp.club today.
