2020 Illinois fall trout season opens October 17

An early opportunity at select trout sites – the Fall Catch-and-Release Fishing Season – will open Oct. 17 at locations marked with an asterisk (*) in the list below. No trout may be kept during the catch and release fishing period, but anglers can keep trout after the opening of the regular season beginning Oct. 17.

The Illinois catchable trout program is funded by those who use the program through the sale of Inland Trout Stamps and the Illinois Fish Management Fund.

No trout may be taken from any of the stocked sites from Oct. 1 until the fall trout season opens Oct. 17. Anyone attempting to take (harvest) trout before the legal harvest season opening will

be issued citations.

All anglers – including those who intend to release fish caught before Oct. 17 – must have a valid fishing license and an Inland Trout Stamp, unless they are under the age of 16, blind or disabled, or are an Illinois resident on leave from active duty in the Armed Forces. The daily catch limit for each angler is five (5) trout.

Illinois fishing licenses and Inland Trout Stamps are available at DNR Direct license and permit locations, including many bait shops, sporting goods stores and other retail outlets. Check the IDNR website at: <https://www2.illinois.gov/dnr/LPR/Pages/LicensePermitVendors.aspx>

Fishing licenses and trout stamps also can be purchased by using a credit card through DNR Direct online via the IDNR website at <https://www2.illinois.gov/dnr>

Not all of the fall trout sites listed below open at 5:00 a.m. on opening day. Anglers are reminded to check the opening time of their favorite trout fishing location prior to the season. For more information about all site regulations, anglers should contact individual sites that will be stocked with catchable-size trout.

Participants in Fall Trout Fishing Season are reminded to follow current public health directives, including maintaining social distancing guidelines, bringing with

them masks in case social distancing cannot be maintained and hand sanitizer containing at least 60 percent alcohol.

The Forest Preserves of Cook County has not made a final decision on opening for trout season, due to conditions related to COVID-19. Please check the FPCC website at fpdcc.com for updates closer to Oct. 17, 2020.

The locations that will be open for Fall Trout Fishing Season are listed below.

- 2020 Illinois Fall Trout Locations:**
- Coles County: Eastern Illinois University Campus Pond, Charleston
 - Douglas County: Villa Grove West Lake
 - Hancock County: Horton Lake, Nauvoo State Park *

More info on Live Blood Analysis and the benefits

What is Live Blood Cell Analysis?
Live Blood Cell Analysis (LBCA) involves magnifying a single drop of blood, taken from a fingertip prick, to a magnification of 1,500 times and takes approximately 45 minutes and is recorded on a DVD. The live blood is then viewed under a microscope with a darkfield condenser which illuminates various components in the bloodstream, such as the state of red and white blood cells, undesirable bacteria and fungal forms. Although Live Blood Cell Microscopy was invented over 80

years ago, only recently, due to the expansion of technology, has the client been able to become involved by observing the immediate test results on a monitor with their analyst.

Why do I need to keep my blood healthy?
Your bloodstream is like a river. It is responsible for transporting oxygen, nutrients, and other live-giving agents to and from the cells throughout your body to maintain optimal health; it is often referred to as the "River of Life". The blood is also a medium for detoxification; it delivers cellular waste to the liver and kidneys for elimination from the body. Unhealthy blood can resemble a swamp; this can cause your cells to become malnourished, injured, and/or they can turn into harmful free radicals. A swampy terrain can be a certain indication of latent or undiagnosed problems and could lead to a degenerative disease. In addition harmful bacteria and microorganisms can feed off these toxins, increasing your risk of disease. It is crucial to maintain a healthy terrain to help ensure optimal health.

Who benefits from Live Blood Cell Analysis?
Anyone who is willing to make the effort to make some change in their life for the better, whether you are ill already, would like to prevent disease or you are simply wanting to feel your best.
