

Anderson Healthcare

Anderson Healthcare

Since opening in 1977, Anderson Hospital has evolved into a regional healthcare network now known as Anderson Healthcare.

As healthcare has transformed, there is a need to provide more coordinated care with broader geographic coverage for our patients. We are better serving our communities through our hospitals, physician offices, cancer center, imaging center, wellness centers and a new Goshen Campus in Edwardsville.

"Throughout its history, Anderson Healthcare has responded to the needs of Madison County and Southern Illinois residents. Each new service and every expansion has been in direct response to community needs," said Keith A. Page, President and CEO of Anderson Healthcare. "Our quality services are evident not only by our accreditations, certifications and designations but by our continued growth.

Together with our valued partners, we are proud to offer this level of care to our communities."

While the organization continues to grow, our mission and vision remain the same. Our 1,600+ team members work together to provide area families with exceptional healthcare services.

Together, we are building better healthcare.
Together, we are building healthy communities.
