

Wound Care

Hamilton Healthcare System Wound Care is designed to provide custom wound care for all our patients. With over 30 years in wound management, Thomas Aycock, MD and Jennifer Armstrong, NP specialize in advanced wound care and treatment.

The evidence based treatment modalities may include negative pressure wound therapy, advanced dressings, cellular tissue products and multi-layer compression.

Frequently treated wounds include the following:

- Minor Burns
- Diabetic wounds
- Arterial wounds secondary to PAD
- Pressure ulcers
- Venous stasis ulcers
- Trauma wounds
- Complex soft tissue wounds
- Skin Tears
- Radiation Tissue Damage
- Chronic, non-healing wounds
- Non-healing or slow to heal wounds
- Non-healing surgical wounds
- Lymphedema related wounds
- Neuropathic wounds
