

# *Create your dream home.*

**T**he Glass Factory is a curator of design, taste and style in the luxury lifestyle market, offering furniture, lighting, textiles, rugs, decor and outdoor furniture. Our products are built to stand the test of time. Drawers pull smoothly, performance fabrics are easy to clean and finishes are forgiving, holding up to daily wear and tear. Our quality represents true value because of the many years it can be enjoyed. We understand that happiness at home starts with the little things; that's why we pay so much attention to them. Button tufting on a sofa, contrast piping on a pillow, a cleverly hidden outlet in a bookshelf.

Of course, furniture should do more than just sit there; it should do something that is practical, usable and wonderful for your life! That is why we hand pick tables with hidden leaves, washable slipcovers, and construction made to last for generations. We search the world to bring you fresh influence, a unique color, an unexpected silhouette, and a global flavor. It is no surprise that so many of our pieces are exclusive works of art. We stress about the details so our guests don't.
