

find out what they would like to have incorporated into their kitchens and they find out the best way to make that work.

After the drawings are done the customer can come in and finalize colors, door styles, or any kind of upgrades.

Kight installs cabinets, countertops, doors, shower doors, mirrors, trim and closet shelving. They also have: lumber, drywall, nails, shingles, etc. Pretty much anything a builder needs, they've got it!

The staffs at Kight Home Center are educated. They know more about their products. You're not getting someone straight out of school or who works part time and can't help you find anything or figure something out, so that makes a big difference. Service is huge there.

**MAKE YOUR
DREAM
HOME
A REALITY**

If you come in looking for something, their employees go get it for you or they can order it for you. The majority of their focus is building new homes and the professional builders. If you want to add on to your house or you want a deck, or redo your roof or build a new house; that's what they do, day in and day out.

Kight also has a great support team for all its contractors, and a nice group of builders. This is where they step in as far as figuring material and getting it set up for delivery and out to the job.

Kight Home Center and their employees are very versatile. They've been in the building industry for a very long time, with several employees having 45 years experience and others with 20+ years; so they've got longevity and the experience you want and need.
