

Jay Shofner points to some of the beams that have been added to Allen's Inn, located on the square in Greensburg. The beams will add support integrity to the building as well as serve as a focal point once the renovation is completed.

Shofner says that Allen's Inn will also be offering basic pub fare, including wings, burgers and fries.

Shofner hopes to be able to offer special events as well as host guests in the tasting room.

Shofner is working to bring back the original look of the building,

including reinstalling a large window in the upstairs area and restoring the entry way to its original entrance, along with many other fine details.

Before and After photos of a fireplace inside the building.

Average timelines for renovation projects

METRO CREATIVE CONNECTION

Home renovation projects are significant undertakings. Working with skilled and experienced contractors can ensure projects go smoothly and are completed promptly.

Timing is a big consideration for homeowners as they begin renovating their homes, and the home improvement experts at HomeAdvisor note that the following are some general timelines for popular renovation projects.

- Home addition: Short of a full-scale demolition and rebuild, home additions are the most time-consuming projects homeowners can undertake. HomeAdvisor notes that its survey of customers who recently completed home addition projects reported that the average time from start to finish was between three and four months. Certain variables, including the scale of the project and the local permits process, can extend the time it takes to complete a home addition.

- Kitchen remodel: Scale is a big factor to consider when estimating the time it takes to complete various home improvement projects, and kitchen remodels are no exception. Users reported projects taking as long as four

months, though the average time reported was roughly six weeks. Projects that require major overhauls like rearranging the plumbing and moving walls will likely take longer than more cosmetic projects that are limited to replacing cabinets and countertops.

- Bathroom remodel: More than 1,000 homeowners surveyed reported that bathroom remodels took about 4.5 weeks from start to finish. Small-scale remodels that focus on painting the walls a fresh color and replacing existing tiles can be completed in less than two weeks. But like with kitchen remodels, bathroom remodels that involve replacing plumbing fixtures and removing walls figure to take much longer than that.

- Siding installation: Users report that new siding projects take roughly two weeks from start to finish. That estimate is the same regardless of which materials homeowners are replacing and installing.

- Replacement windows: Homeowners who want to replace all the windows in their home can expect such a project to take roughly three weeks. Much of a contractor's time during a window replacement project will be spent on up-

front measuring and then ensuring a tight fit once the windows have been installed.

Peace of Mind

Comes from knowing that immediate health care is available 24/7

24 Hour Skilled Nursing Care

- Medication Management
- Hospice and comfort care
- Tracheostomy/Respiratory care
- Cancer care
- Dementia and Alzheimers care
- Cardiac care
- Healthy healing wound program
- Stroke care
- Restorative Nursing Care
- Diabetes care
- IV therapy
- Pain Management
