"My administration will do whatever it takes to bring human traffickers to justice, and this operation sends a message that we won't stand idly by while they exploit those who are most vulnerable," said Governor Tate Reeves. "Human traffickers should think twice before stepping foot into Mississippi."

"The Mississippi Department of Public Safety, in conjunction with the Mississippi Bureau of Investigation, will continue to collaborate with local, state, and federal agencies to put an end to human trafficking in Mississippi," said Commissioner Sean Tindell. "Our agency is committed to referring human trafficking victims to dedicated services and arresting the criminals behind their exploitation."

"Human trafficking has no place in Mississippi. And, traffickers need to know that our women and children are off limits," said Attorney General Lynn Fitch. "I am grateful for dedicated law enforcement officers, like those at the Mississippi Bureau of Investigation, for their continued partnership in protecting the vulnerable.

And, our work doesn't end when the operation ends. We must support and empower victims to move forward without shame or blame. Our efforts will always be victimfirst as we connect recovered individuals with the tools and resources they need to build a new life with hope and dignity."

The Mississippi Bureau of Narcotics, the Mississippi Highway Safety Patrol, Tupelo Police Department, National Guard Counterdrug Task Force, Booneville Police Department, Monroe County Sheriff's Office, Tennessee Bureau of Investigation, Restore Corps Memphis, Center for Violence Prevention, and the Office of the Mississippi Attorney General assisted in the operation, which resulted in the arrests of the following individuals:

ing depression, SUD, and suicidal ideation, might reduce COVID-19-related mental health consequences.

According to Peter Loeb, co-founder of Lionrock, one of the reasons telehealth is so effective in treating people with substance use disorder and supporting long-term recovery, is its flexibility and privacy. People can seek and HIPAA-compliant receive treatment from the privacy of their home, any time of day. To-date, a major barrier for people seeking treatment is the fear of stigma in their communities; online treatment's privacy eliminates that concern.

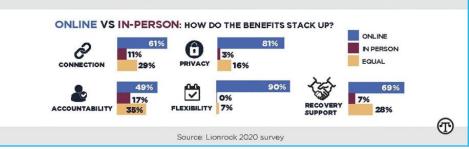

The benefits of telehealth inspired Loeb to create National Online Recovery Day, which is celebrated on September 22, as part of National Recovery Month. National Online Recovery Day is a campaign to raise awareness for online Addiction Risk Rising With treatment of substance abuse. COVID-19: The Center for It is the first national health Disease Control (CDC) sur- awareness day focused on veyed adults during late June the benefits and advantages of telehealth services for any health issue. While 42.2 million people The agency found an alarming need treatment, SAMHSA data reveals only 4 million people actually receive it. The COVID-19 pandemic threatens to create an epidemic from substance abuse, but by improving awareness of, and access to, online care, more Americans can receive the care and support they need.

DURING THE COVID-19 PANDEMIC, ONLINE RECOVERY SUPPORT MEETING ATTENDANCE HAS GROWN OVER 400% AND 80% OF THE NEW PARTICIPANTS HAD NEVER ATTENDED ANY SUPPORT MEETINGS BEFORE. **ONLINE OR IN-PERSON**

one you care about is among the more than 42 million Americans battling addiction and struggling with the isolation and stress of the pandemic, there's a ray of hope and a positive path forward in the form of online recovery and support programs. Among increased feelings of loneliness, depression and anxiety, therapy has become a necessity, and in the midst of COVID-19, the recovery community has pivoted to online meetings and teletherapy sessions to fight the war of isolation.

proven as effective, if not superior to in-person treatment, according to the Department of Veterans Affairs.

In addition, an independent study conducted by Lionrock Recovery, a telehealth provider of substance use disorder treatment and support, showed that 80 percent of people in their online recovery meetings since the pandemic started, had never attended any support meetings-either online or in person - prior to the coronavirus outbreak. Half of those surveyed said they would attend only online meetings when restrictions were lifted. Nearly all of the participants (98 percent) said they would continue to attend online meetings, even when in person meetings become a
