Your gums. Your health.

Have you been told about gum disease?

Fact: 90% of people in America have gum disease, but only 30% get treated. And it's about more than your teeth. Studies link gum disease with heart disease, stroke, diabetes, low birth weight babies and some forms of cancer.

Now, there are alternatives to traditional gum surgery with the LANAP® protocol, the only FDA-certified laser treatment for gum disease.

Less Pain • Faster Healing Time • No Cutting or Stitching

If you have gum disease, Dr. Ryan Tracy can help you bring your mouth and gums back to health. Get in touch, and get your health on the right track.
