

# Horizon Health recognizes employees on their achievements in medicine

Horizon Health recognizes the following employees for their recent achievements:

Yaniv Cozacov, MD, general surgeon, has been named Adjunct Clinical Assistant Professor of Surgery at Indiana University School of Medicine—Terre Haute.

Joy Williams, APRN, FNP, DCNP, has completed requirements as a Dermatology Certified Nurse Practitioner through the Derma-

tology Nurses' Association. The certification demonstrates her expertise in treating diseases and medical conditions affecting the skin. She joins Angela Hamilton, APRN, FNP, DCNP, who is also a Dermatology Certified Nurse Practitioner.

Susan Arp, APRN, FNP, NCMP, has completed requirements as a Certified Menopause Practitioner through the North American Menopause Society. The cer-

tification demonstrates her high level of competency in the field of menopause.

Kimberly Marlow, RT, and Lester Noval, RT, have earned certification in "https://www.myhorizonhealth.org/services/respiratory-therapy/pulmonary-rehab/" Pulmonary Rehabilitation through the American Association for Respiratory Care. Pulmonary Rehabilitation is a specialized program that treats

individuals who have chronic breathing conditions.

Lorie Edwards, PT, DPT, and Danielle Colvin, PT, DPT, OCS, have earned advanced certification in dry needling – a technique that helps reduce muscle pain and tension. They join Brock Athey, PT, MPT, who also offers the service. Their level-2 certification allows for the treatment of more complex muscle groups.

Lorie Edwards, PT, DPT

Danielle Colvin, PT, DPT, OCS

Lester Noval, RT

## PATHWAYS

Continued from 5

need for emergency medical technicians. EMS faculty and staff worked with Sarah Bush Lincoln instructors and Abbott Ambulance Services to host an 8-week fast track EMT training curriculum beginning this month. Abbott is paying 10 students a wage, covering their tuition and fees, and guaranteeing them a position upon successful program completion and licensure exam.

This fall, the Business Division will welcome the first class of students to the new Court Reporting Technology program. Business faculty have worked closely with area court reporting professionals to create this major in response to a regional and national shortage of court reporters. According to the Occupational Profile on the Illinois virtual labor market information website, there will be a projected 80 job openings in this field each year through 2026.

A few years ago, Heartland Dental invested in future dental hygienists by donating state-of-the-art equipment for the Heartland Dental Dental Hygiene Lab. This year, the company selected Lake Land College to pilot a new educational partnership that provides support and opportunities, both financially and academically, to students preparing to enter the field of dentistry. Dental Hygiene faculty

have also expanded opportunities for students by working with Eastern Illinois University to establish a transfer pathway. All Dental Hygiene Alumni now have an opportunity to transfer to Eastern Illinois to pursue a bachelor's degree in public health.

Several programs recently updated curriculum to arm students with the skills needed for success today and into the future. The Humanities and Communications faculty enhanced speech and radio-TV courses by creating a new Broadcast Communications department that ensures students are trained in a multitude of skill sets from creating videos, to presenting online to writing advertisements. The Information Technology and IT-Graphic Design programs recently aligned course offerings and programs to maximize opportunities for students interested in design, programming, web creation and gaming careers. The newly revised Diesel & Ag Power provides students hands-on experience working on diesel machinery and a variety of brands, preparing them for future careers in the field or on their family farm.

In addition to these program enhancements, the college continues to work with the Effingham Regional Career Academy to secure funding for a new building and to develop training programs for both high school students and adults or incumbent workers that

meet the needs of our area business partners. To date, 14 schools have signed inter-governmental agreements to participate in this initiative.

We look forward to welcoming you to campus to tour the new Workforce Development Center and the opportunities it presents for customized training. The center houses Adult Education, Center for Business and Industry, the Manufacturing Skills Lab, WIOA and De-

partment of Corrections.

As we enter the spring season and look forward to warmer weather, please let us know how we can assist you in fulfilling unmet workforce or training needs. As you can see, we are committed to partnering with area businesses and creating new opportunities for district residents to gain the education they need to advance in their careers.

## Trusted Compassionate Care

*"The most important person in the room is the patient. Our job is to make it the best experience in what may not be the best situation. We work together to make that happen."*

**Kellie Jones-Monahan, MD, FACS**
