## OUR NEWEST SERVICE - 24/7 STROKE CARE The Doctor Can See You Now

Michael Davis, HC Director of Schools helped HMC test telemedicine.

Now using telemedicine technology in the HMC Emergency Department to move care beyond the hospital to provide quality and lifesaving patient care closer to home.

Stroke care is one of the most time-sensitive emergencies we treat at HMC. Getting our patients face-to-face with a neurologist as fast as possible is important, and now we can do it.

With a stroke, time is brain — minutes and seconds matter.
