

Everyone has a story.

Canfor's story in Alabama has its roots in Scotch Gulf Lumber, and its deep family and community ties. We're proud of our past and inspired by our role in creating a more renewable future.

Our knowledgeable foresters work closely with private landowners to buy standing timber from forests managed to comprehensive environmental, social, and economic standards.

Our mills in Fulton, Jackson and Mobile — and our new mill under construction in Axis — are key to being recognized around the world for the superior quality of our products and our exceptional customer service.

And, our sector provides a diverse range of well-paying jobs that support families, sustain communities and grow our green economy.

We're proud to stand tall with Alabama's forest products industry.
