

Let's Go "Fishing"

By H D Overholt
C-T Reporter

The joy of springtime involves excitement as the temperatures bring warmth to Mother Earth and outdoor adventures. Grabbing a fishing pole and digging up some bait can produce some fine dinnertime fare, yet some individuals begin to observe the forest floor for a delicacy known as "Dry Land Fish."

In Kentucky during March, April, and May wild morel mushrooms begin to appear after a warm rain shower under hardwood trees such as apple, ash, cottonwood, elm, hickory, and sycamore. Southern slopes usually receive abundant sunlight and warming of the soil with decaying matter are good locations to seek mushrooms.

It is changeling to see the morels as the color
