

6 signs you may need a new HVAC system

There's no place like home, especially when that home is a comfortable and safe haven. One of the ways residents find comfort in their homes is by maintaining the right indoor temperatures, which fluctuate along with the seasons. While there is much to be said about opening windows and doors to let Mother Nature do her thing, indoor comfort is often maintained with an HVAC system.

HVAC stands for heating, ventilation and air conditioning. It can include

heat pumps, furnaces and air conditioning units. It is an automated system that works by adjusting a thermostat to regulate air temperature, and sometimes humidity, in the home. According to Enviguard, a commercial contracting provider, HVAC systems also may be used to improve indoor air quality through filtration and oxygen replacement.

As with any mechanical device, an HVAC system has a life span that must be considered. Should any of the following

conditions be present, it is likely time to consult with an HVAC technician to see if repairs or replacement of the entire system is warranted.

1. Age

If the HVAC system is more than 10 years old, it could be time to begin budgeting for a new unit. Many modern, efficient systems may last 12 to 14 years with routine maintenance. But it's good to keep an HVAC system's age in mind so you can readily
