Nicknames – Wigs
Birth Date – 1/26/2005
Favorites:
Food – Buffalo wings
Drink – Hose water
Movie – Lord of the Rings: The Two Towers
TV Shows – Parks & Recreation
Band/Artist – Greta Van Fleet
Sport – Football
Athlete – Karter Jensen
Class – Science
Quote - “It is the job that is never started that take the longest to finish.”- Samwise Gamgee
Teacher – Mr. Nordick
Book - Lord of the Rings: The Fellowship of the Ring
Color – Midnight blue
Season – Winter
Hobbies – Playing video games
Most Embarrassing Moment – Dropping my trombone slide right before the National Anthem.
Advice to the underclassmen – Enjoy as much of high school as you can and don’t just stay at home.
Future – Attend NDSU for something in the medical field.

Team Rothsay Rain members Josh Honer, Katie Reber, Wylie Brenden, and Zachary Christ with their 4th place ribbons.

By Jasmine Marty

The Senior High Knowledge Bowl is an intellectual competition that combines intense rivalry with the amazing ability to memorize academic knowledge. Members of a team work together to provide answers to both spoken and written questions, while the teams compete to be the first to “buzz in” and provide an accurate response to each question.

The beginning of the season for the Rothsay’s 2022-2023 Knowledge Bowl team began with multiple strong showings.

Jennifer Sletten, the coach of the teams, is immensely pleased with the performance of the team and says, “This season, we have started out really strong. Out of more than forty teams, our best team came in fourth place, while our other two teams finished 18th and 20th. We

also came in second place in the second written round, which is the highest any of my teams have ever placed in any of my competitions. In addition, one of our teams was presented with an English accomplishment award for having the highest percentage of right responses to questions based on English Language Arts. I cannot wait to find out how the remainder of the season is going to play out.”

Katie Reber, who also is a member of the team that came in fourth place, is looking forward to the remaining part of the season and is curious to see how things go. In addition, she offers her thoughts on the competition by noting, “This season has been really fun and successful. That was a really cool experience, and we got fourth place in the Concordia Meet, which was also really cool, and I am looking forward to continuing to improve my knowledge as the season goes on!”

Andrea Phillips, Lauren Reber, Allison Phillips, Savannah Sullivan, and Bethany Danielson showing off their English Language Arts win from a recent meet.

Century Farm Applications Are Now Being Accepted

Minnesota families who have owned their farms for 100 years or more are invited to apply for the 2023 Century Farm Program. Produced by the Minnesota State Fair in conjunction with the Minnesota Farm Bureau

Federation, the Century Farm Program was created to promote agriculture and honor historic family farms in the state. More than 11,000 Minnesota farms have been honored since the program began in 1976.

Family farms are recognized as a Century Farm when three requirements are met. The farm must be: 1) at least 100 years old according to authentic land records; 2) in continuous family ownership for at least 100 years (continuous residence on the farm is not required); and 3) at least 50 acres and currently be involved in agricultural production.

A commemorative certificate signed by Governor Tim Walz, the State Fair Board of Managers President Joe Scapanski and Minnesota Farm Bureau Federation President Dan Glessing will be awarded to qualifying families, along with an outdoor sign signifying Century Farm status.

Applications are available online at mnstatefair.org/about-the-fair/

awards-and-recognition/; at fbmn.org; by calling the State Fair at 651-288-4417; or at statewide county extension and county Farm Bureau offices. The submission deadline is Monday, March 6. Recipients will be announced in the spring. Previously recognized families should not reapply.

Information on the Century Farm Program will be available at the Minnesota Farm Bureau exhibit during the 2023 Minnesota State Fair. A Century Farm database is also available at fbmn.org.

About the Minnesota State Fair: The Minnesota State Fair is one of the largest and best-attended expositions in the world. Showcasing Minnesota’s finest agriculture, art and industry, the Great Minnesota Get-Together is 12 Days of Fun Ending Labor Day. The 2023 Minnesota State Fair will run Aug. 24 through Labor Day, Sept. 4. Visit mnstatefair.org for more information.

Area Students Named To NDSU Dean’s List

CHASE BALKEN

CHRISTOPHER CARRILLO

These Rothsay area students were among the 4,226 North Dakota State University students to be placed on the fall 2022 dean’s list.

A student must earn a 3.50 grade point average or higher and be enrolled in at least 12 class credits to qualify for the summer list. Students’ majors are also listed.

Students to make the list are:
Chase L. Balken - Exercise Science and Christopher T. Carrillo - Manufacturing Engineering.

Educational Tools To Gear Up For Spring Semester

The spring semester represents the academic home stretch, that time of the school year when students can see the finish line. But that doesn’t mean they should coast their way to the end of the year. Be sure that they’re properly equipped to put in their best effort.

Fresh School Supplies

It helps to give the start of the spring semester the same importance in one’s mind as the start of the school year. After all, new supplies can motivate students to get serious about their coursework. To that end, consider doing a full inventory of pens, pencils, notebooks and more, and then updating and replacing items as needed.

Perfect Note-Taking

Note-taking can quickly become tedious or disorganized without a proper strategy. The good news is that now students have technical solutions at their disposal, some of which are free, to eliminate such concerns. For example, OneNote by Microsoft, allows students to take notes in a number of formats, include typing, stylus and even with audio. They can then access those notes across their devices. Plus, sharing and collaboration features can help out when students are assigned group projects.

Master Math

Though most students are back in the classroom, online resources

are still as essential as ever for homework, studying and research. ClassPad.net is a free online mathematics platform for teachers and students that supports arithmetic, graphing, geometry and statistics and offers a personalized approach to what is for many, one of the toughest school subjects. Its greatest benefit is its cross-platform capability.

Plus, using the platform, teachers and students can share problems and solutions with each other. For students who prefer a scientific or graphing calculator, the many offerings available from Casio feature natural textbook display, intuitive design, as well a host of other features that make learning mathematical concepts fun and engaging.

Cram for Exams

Even with the best of intentions, a study session can be easily derailed by any number of digital and analog distractions. Keep students both on-task and refreshed with a productivity app that builds in short but intense work periods of no interruptions interspersed with quick breaks. The Marinara Timer, for example, will allow your student to choose between different settings and find the one that fits best with their study style.

For their best semester ever, help students gear up with the supplies and tools they need to stay organized, on-task and comfortable with the material. (StatePoint)
