**Saturday 8-11 a.m.**

**Would you like to have an extra \$28,000?**

Some advisors believe that farmers involved in a marketing program do a better job of risk management and market planning. The end result may be a 10% improvement in the average selling price of their crops. For the average farmer, that could mean increased revenue of \$28,000. That's where our Marketing Line of Credit comes into play.

At First National Bank, we have been making loans to area farmers for generations. We can help with your loans for operations, equipment, livestock, real estate or marketing.

We have years of experience in making ag loans and want to be your lender – call 217-543-3850 or toll free at 1-888-543-3850.
