Introducing.....

New technology to improve your health

THERADOT® - Deep Oscillation

A new technique to relieve swelling & pain

- THERADOT® uses an electrostatic field to create deep, but pleasantly soft oscillation to the area being treated including skin, connective tissue, and blood and lymph vessels.
- Prevents the buildup of fluid which assists with an increased healing process.
- Creates a gentle vibration within the tissues which relaxes the underlying muscles, making soft tissues more pliable.
- Enhances tissue pliability for manipulations aimed at increasing range of motion.

THERADOT® has been shown to:

- Facilitate muscle relaxation
- Increase circulation
- Assist with lymphatic drainage
- Relieve aches and pains
- Reduce edema (swelling)
- Improve wound healing
