Smell Gas? Act Fast!

Natural gas is a colorless and odorless fuel. For safety reasons, a chemical odorant called mercaptan is added for easy detection of a suspected natural gas leak. This odorant has a distinctive “**rotten egg**” type odor.

If you detect even a small amount of this odor in the air:

- Do not try to identify the source or stop the leak yourself.
- Leave the area immediately, and move a safe distance away from the potential leak, while avoiding any action that may cause sparks.
- Avoid using any sources of ignition, such as cell phones, cigarettes, matches, flashlights, electronic devices, motorized vehicles, light switches or landlines, as natural gas can ignite from a spark or open flame, possibly causing a fire or explosion. While natural gas is non-toxic, in confined spaces it can displace oxygen, potentially leading to asphyxiation.
- Call Atlanta Gas Light at **877.427.4321** or **911** once you are out of the area and in a safe place.
