An early spring means more ticks to avoid

As spring arrived across much of the U.S., more people ventured outside to enjoy nature, but unfortunately, the warmer temperatures also awakened ticks. "Tick season seems to be off to a fast start, with an unusually high number of bites already reported across the country," reports Mike Stobbe of The Associated Press.

All tick bites warrant attention because they can spread "serious diseases, including Lyme disease, Rocky Mountain spotted fever and alpha-gal syndrome, a red meat allergy," Stobbe explains. "Lyme disease is the most common, with an estimated 476,000 people
