

Why your 10 year old need a electric dirt bike/Surron

Finley Blair
4th Grade, Lincoln Trail
Mrs. Collignon

Your kids may have been asking for an electric dirt bike. They have probably been bothering you for a long time. Electric dirt bikes have been proven to reduce stress. If they have just lost a basketball game they could ride it to calm them down. There are many reasons why you should think about your child having one or not.

First, there is the cost. They can range from \$5,000 to \$200. A good price for a beginner electric dirt bike is from \$600 to \$1,500. It may seem expensive but if they want one they have to pay you back. They can also work for one or do chores for a while.

Second, you need to think about the safety. Some Ebikes may seem fast but you can tune them to a good speed for your kid. And if needed you can get the right size standing wheels. Training wheels are a good way to

learn to ride an electric dirt bike. But if you get them one you may have to make them wear a helmet for a while but if they are experienced they may not have to wear one.

They can be a good way of transportation. Ebikes can get them from place to place on the sidewalk and the bike path are good places to ride if going to a friend. You may be worried for them but they are 10 and responsible and know not to trust strangers. You do not have to take them to

their friends house because they can take themselves with a Ebike.

Dirt bikes have lots of styles. Ebikes can be customized to be whatever you want but this can be expensive from \$200 to \$3,000. Customizations can be very boring or nice. They can range from penny wise to your favorite football player or team.

There are lots to consider when thinking about buying an Ebike. But, anything is possible with an Ebike.

Everything about Ferrets

Chloe Zollman
4th Grade, Lincoln Trail
Mrs. Collignon

Do you know where ferrets are from? Ferrets are mainly from Europe, North Africa, and parts of Western Asia. Here are interesting facts about ferrets.

Ferrets are domesticated members of the weasel family. Female ferrets are called Jills, while males are called Hobs. Baby ferrets are called kits, but when ferrets are together they are called a "business." Ferrets sleep about fifteen to twenty hours a day. When born, ferrets are white and deaf with poor eyesight. All ferrets rely on hearing and smelling.

Ferrets don't see colors very well; only seeing a few colors. Ferrets don't sweat, so they are susceptible to heartstroke. These facts are some of the things that make ferrets unique.

- Fun Facts:
- Strict carnivores
 - Usually high protein
 - Specialized diets
 - Need to eat frequently
 - When ferrets bite you leads to blood with a small or big wound
 - Lives to 6-10 years old
 - Oldest ferret was 14 years old
- So if you go to your nearby pet store make sure to look for the ferrets.

A Vacation Destination That You Should Visit

Emersyn Leibering
4th Grade, Lincoln Trail
Ms. Fleetwood

Do you have a favorite vacation spot? I think you should consider Gatlinburg. It is about 5 hours and 38 mins from Santa Claus, Indiana. There is a Mountain Getaway to the Great Smoky Mountains. Gatlinburg is the gateway community for Great Smoky Mountains National Park, the most visited National Park in America.

There are so many things to do! A few things to do are ziplines, space needles, museums, and mountain adventures. Those are just some of the things you can do while

there. The ziplines at this place are called Climbwork. The space needles in Gatlinburg are called Space Needles. The museums are at many places like The Salt and Pepper Shaker Museum, Hollywood Star Cars Museum and Gatlinburg Pinball Museum. They do mountain adventures at Ober Mountain. You can see a lot of animals like american black bears, white-tailed deer, wild turkeys, elk, bobcats, and various salamanders while visiting.

That is why I think you should visit Gatlinburg, Tennessee. There are a lot of things to do. I hope you go there and enjoy the activities and see the great animals.

Elite Air Trampoline Park

Cameron Patrick
4th Grade, Lincoln Trail
Ms. Fleetwood

Elite Air is a trampoline park in Owensboro. It is really fun, and here's some reasons why I think you should go. One reason is that it has a lot of

trampolines there that you can bounce on really high. It also has other things like dodge ball, a tornado machine and it also has a giant bouncy castle. Another reason why you should go there is because they have pizza! It is really good

and they also have a soda machine too. It has all kinds of soda you can pick from! They also have comfortable black chairs that shake if you press one button. They also give you a pair of cool socks. One more thing is that

they have their birthday rooms where you get to celebrate your big day! They give you free pizza as a gift from them, too! So, this is why I think you should go to elite air. It is really fun and has all the activities you can ask for!

Offseason NFL trades 2026

Tripp Morgan
Grade 5
Mrs. Roos
Luce Elementary

Ladies and gentlemen I would like to say that there are some blox buster trade this month. The Raiders are saying that they are going to

Trade Max Crosby, an edge rusher out of eastern Michigan to the Ravens. But when the ravens saw how much he costs and switched up and went for Trey Hendrickson, an edge rusher out of Florida Atlantic. Max was a Raider for life or what he said.

People I heard that the 2026 Super Bowl mvp Kenneth Walker got traded to the Chiefs after getting a Super Bowl ring with the Seahawks they were acting weird to Walker last year and now they decided to pull the trigger.

All About Goats!

Tylee Jennings and Allie Utz
Grade 5, Mrs. Roos
Luce Elementary

Did you know that goats pupils are rectangular to give them a larger range of vision, however they're unable to look up or down without moving their head.

Goats are smart, inquisitive, and playful. Goats are really friendly. There are a lot of different goats like Boar goats, American goats, Nigerian Dwarf goats, Damascus goats, Saanen goats, and Jamnapari goats. As all domestic breeds of goats are descended from mountain goats, making them excellent climbers with great balance. Mountain goats can jump up to 12 feet or 3.5 meters in a single bound. Some goats have also been observed climbing trees. Goats communicate with each other through vocalizations called bleating. The sound of these calls is what allows goats to identify individuals and recognize emotional states. Each

baby goat (which is a kid) has a distinct call, and that helps its mother recognize it.

Do you know what goats eat? Well they'll eat a lot for you, the main thing goats will eat is that they'll eat goat food, grass, and hay. They love a lot of other stuff like animal crackers, apples, carrots, and a lot more! They love a lot of plants too like roots, twigs, and pine trees! Did you know that goats hate to be alone, if you ever buy a goat buy 1 more goat or more. Goats are very social too, they love to spend time with their owner. Goats can remember up to 40 people once they see them. Goats' favorite color is orange and their least favorite color is blue.
