

Tractor Pull Brings The Thunder Again

The roar of engines, the smell of fuel and the ground-shaking power of pulling return to the Clay County Fair grandstand when the Modified Truck & Tractor Pull takes over at 7 p.m. Friday, July 10.

Fans may want to bring ear protection, because this event is known for bringing plenty of noise along with the horsepower.

Now in its seventh year at the fair, the event has become a grandstand favorite for fans who enjoy horsepower, smoke and high-powered competition.

The event will bring a full lineup of pulling action to Barnesville, featuring gas trucks, diesel trucks, hot stock farm tractors, modified tractors, open tractors and two-wheel-drive trucks.

Tractor classes include 9500 Hot Stock Farm, 6200 Limited Modified, 6500 Modified, 7500 Open and 9500 Open. Some look like farm tractors at first glance, while others are purpose-built pulling machines powered by multiple V-8s, jet turbines or aircraft engines.

The event will also feature TWD Trucks, which bring supercharged power, hard pulls and crowd-pleasing wheel stands to the grandstand.

Behind all the noise and excitement, competitors follow detailed safety and competition rules, with inspections covering everything from weight and hitch height to kill switches and required driver safety equipment.

Admission is \$20 for ages 12 and older and \$5 for youth ages 11 and younger.

For more information, contact Ryan Tichy at 218-639-5325. Classes and rules are available at www.rvrapulling.com.

Come and watch the action!

Gas truck classes include Street Gas 4x4, Pro Stock 4x4 and Open Gas Mod 4x4, where the Chevy-versus-Ford-versus-Dodge rivalry comes alive on the track.

Diesel truck classes include Modified Street Diesel 4x4, Pro Street Diesel 4x4 and Super Stock Diesel 4x4. These turbocharged machines are known for their smoke, speed and intensity as they dig in and pull.
